

Controls:

Picture Box – This would display company logo on the top of the application screen

Label – I would write out the company name, any headers for data entry, and to display any changes in the inventory.

TextBox – User can input if they added/removed an item from the inventory

Buttons – users can use these to update inventory as well as return to the home screen and to exit the application

DateTime Picker – To display when an item was added or removed from the inventory.
